

PIYOOSH KRISHNA M

BCA – Artificial Intelligence & DevOps | Aspiring AI Engineer

piyooshkrishnamnair@gmail.com | +91 9188552443 | Kozhikode, Kerala, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Motivated BCA student specializing in Artificial Intelligence and DevOps with hands-on internship experience in Python, machine learning, and data analysis. Demonstrated ability to deliver end-to-end data and ML projects including spam detection, student performance analysis, and IPL data analytics. Eager to apply theoretical and practical skills through industry opportunities in AI/ML engineering or data science.

PROFESSIONAL EXPERIENCE

AI & Machine Learning Intern | [Acadeno Technologies Pvt. Ltd.](#) May 2026 | Kozhikode, Kerala

- Completed a 60-hour intensive AI & ML internship focusing on real-world applications.
- Gained hands-on experience in Python, machine learning algorithms, and data analysis workflows.
- Developed and tested practical ML models; explored applications such as classification and data preprocessing.

EDUCATION

Bachelor of Computer Applications (BCA) – AI & DevOps 2024 – 2028

Chinmaya Vishwa Vidyapeeth (Deemed to be University), Ernakulam, Kerala | **CGPA: 9.30 / 10 (through Semester 3)**

TECHNICAL SKILLS

Programming Languages: Python, Java, C (foundational proficiency)

AI & Machine Learning: Supervised Learning, Classification, NLP (TF-IDF), Exploratory Data Analysis (EDA)

Data & Libraries: Pandas, Matplotlib, Scikit-learn, Jupyter Notebook

Databases: SQL (queries, filtering, joins), DBMS concepts

CS Fundamentals: Data Structures, Sorting & Searching Algorithms

Tools & Platforms: Git, GitHub, Visual Studio Code, MS Excel

PROJECTS

Spam Email Detection System – [github.com/piyoosh-krishna/spam-email-detector](#)

- Built an end-to-end ML pipeline to classify SMS/email messages as spam or ham using a Naive Bayes classifier.
- Applied TF-IDF vectorization for text feature extraction and achieved high classification accuracy.
- Implemented custom prediction functionality for real-time user input evaluation.

Student Performance Analysis – [github.com/piyoosh-krishna/student-performance-analysis](#)

- Analyzed a student performance dataset to identify key factors affecting academic scores.
- Performed data cleaning, feature engineering (average score, pass/fail labels), and EDA using Python and Pandas.
- Visualized subject-wise and gender-based performance trends with Matplotlib.

IPL Data Analysis – [github.com/piyoosh-krishna/ipl-data-analysis](#)

- Analyzed IPL match datasets to evaluate team performance, toss impact, and venue-based match trends.
- Applied data aggregation techniques to identify top-performing teams and players across seasons.
- Produced season-wise and venue-wise insights supported by charts and graphs.

Python Rule-Based Chatbot – [github.com/piyoosh-krishna/python-chatbot](#)

- Developed a conversational chatbot using Python with conditional logic for dynamic query handling.
- Integrated the datetime module for real-time responses; designed fallback and greeting flows.

CERTIFICATIONS & ACHIEVEMENTS

- Python (Basic) – HackerRank Skill Certification
- DevOps Workshop – National Institute of Technology Calicut, Tathva '24

CORE COMPETENCIES

Analytical Thinking • Attention to Detail • Problem Solving • Team Collaboration • Communication
